

What If Just One Product  
And One Opportunity  
Could Change Your Life?

**CBD Information You Can Understand**

# What Is CBD?

Cannabidiol (CBD) is just one of over 85 cannabinoids that is identified in the cannabis plant. CBD is becoming increasingly popular amongst the masses for having a wide scope of medicinal benefits – due to clinical reports and mounds of test data showing little to no side effects and a lack of psychoactivity (typically associated with marijuana products and high THC).

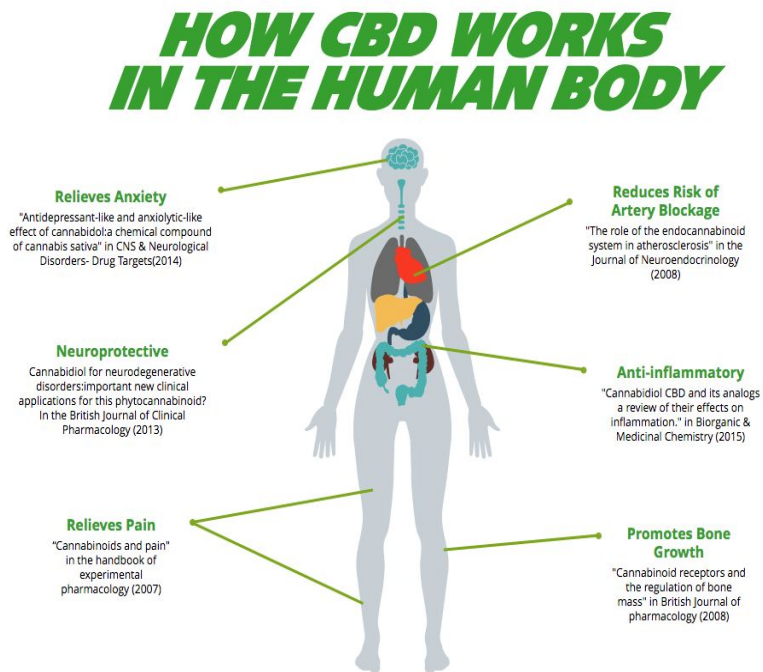

Cannabidiol (CBD) is not only a major phytocannabinoid, it is the most concentrated form from the three main cannabis plants. The three main forms to use cannabis are Hashish, Resin, & Oil.

# Phytocannabinoids

For the first time in 1964, CBD isolation was reported and it was the beginning of cannabinoid synthesis. Originally, this synthesis started on CBG, but since CBG is present in most of the Cannabis types in small amounts, the majority of the research was concentrated on THC and CBD. Besides the Cannabinoids that are naturally occurring in nature, pharmaceutical companies have synthesized cannabinoid compounds in order to market leading drugs in the pharmaceutical market. Some of these chemically modified drugs do not have psychoactive effects, but retain some of the health benefits from the cannabinoid properties. However, some of these synthetic drugs can have a life-threatening adverse effect, or cause other issues in the human body. Phytocannabinoids, on the other hand, have been used for many years, and no life-threatening side effects have ever been reported.

# How does CBD work in the human body?

CBD or cannabidiol is the main active compound in hemp, and unlike THC, it is not psychoactive, so it doesn't make people high. As you know, inside the human body there's the endocannabinoid system, with receptors spread throughout the brain and body.

# The History Of Hemp

**Hemp has a very vast history that cannot go unnoticed.** We are very excited to be at the forefront of what we believe is the most valuable commodity to mankind.

## **Hemp History Facts:**

- First American Flag was made from Hemp
- George Washington and Thomas Jefferson both grew Hemp
- Ben Franklin made Hemp paper
- The Declaration of Independence was drafted on Hemp
- Hemp was used as rope for ships, and it was a required crop in the American colonies
- Hemp has been grown for the last 12,000 years
- Hemp was used as money in the 1800's
- You used to be jailed for NOT growing Hemp
- You can make over 25,000 products with Hemp

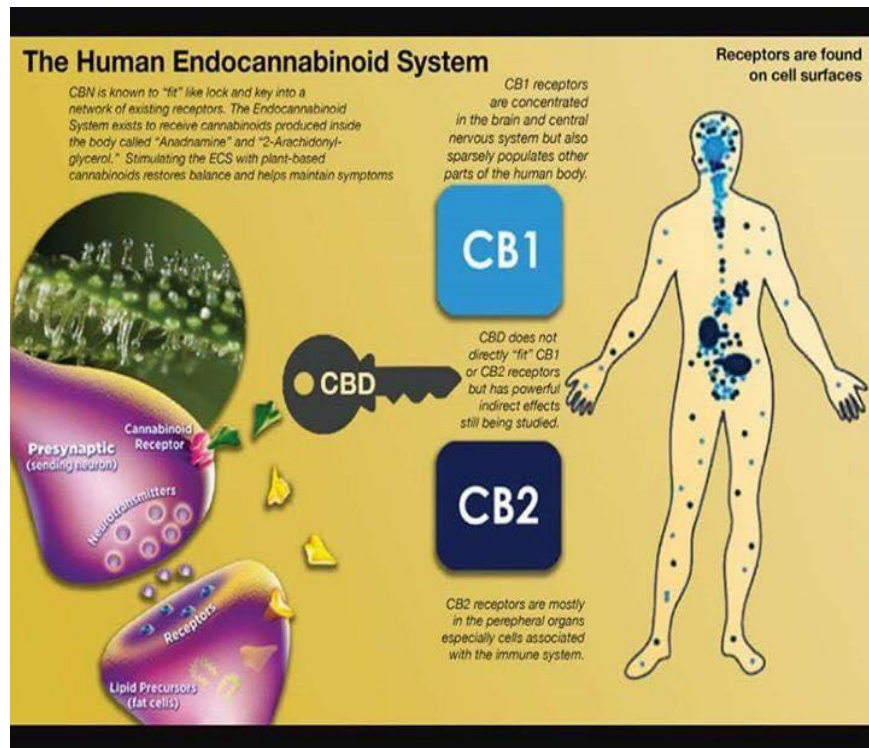

# Cannabis Industry

The Cannabis industry is projected to be at 50 billion by 2026. There are over 23,000 studies that show the benefits of medical cannabis for a variety of diseases and health conditions. It's backed by an enormous body of scientific research, enthusiastic public opinion, and more progressive cannabis laws, which is giving cannabis the reputation it deserves as a groundbreaking health solution.

# The Endocannabinoid System

Every major civilization in history has recognized hemp as #1 on its list of important plants. The ancient Chinese, Indians, Egyptians, Assyrians, Persians, Greeks and Romans all revered hemp as an incomparable source of food and medicine. Now modern science is validating what the ancients all knew — and uncovering exciting new discoveries about hemp.

We are hard-wired with a system of cannabinoid receptors throughout our brains and bodies. When these receptors are activated, they enable two-way communication between body systems; something previously thought to be impossible.

# How Our CBD Products Work

At Hemp Worx, our CBD products utilize the full spectrum Cannabis plant mixed with Hemp Seed oil. **Not all hemp is created equal. Our CBD Oil is made from NON-GMO, PESTICIDE FREE, CO2 Extracted Hemp Oil.**

In our experience, a full spectrum plant gives the Endocannabinoid system (ECS) the full cannabinoid profile of CBD, CBG, CBC, CBN, in order to substantiate the health claims. We have over 120 cannabinoids in our CBD formulas which perfectly inhibits the CB2 receptors in the body. Other competitors claim to have a 99% purity which is usually in the form of “Isolate” or an “Extract”. Although the purity level is higher, the body is only receiving CBD, not the full cannabinoid profile. CBD Isolate is cheaper to manufacture, and when the CBD is isolated, those products lose its effectiveness.

# So what is “the Whole Plant” ?

The whole plant contains CBD, and other natural plant constituents (terpenes, sugars, flavonoids, secondary cannabinoids, etc.) that are found in all parts of hemp. When we say “whole plant” we are referring to the variety of constituents (more than 500 trace compounds) in the hemp oil itself.

As with so many aspects of this amazing plant, the answer is simple: There is no single active ingredient, no magic molecule in hemp. The many cannabinoids and compounds found in hemp work together, synergistically, to create outcomes they could not achieve on their own.

Scientists call this ‘the entourage effect,’ and it’s been proven over and over.

Likewise, the diverse compounds and chemicals in hemp combine and interact to create a sum that is greater than its parts. For instance, the aromatic terpenoids that give hemp its distinctive smell have been proven to block some receptors in the brain, while making it more likely for cannabinoids to bind to other receptors. Play this dynamic out across and among hemp’s hundreds of compounds, and you begin to understand why whole-plant CBD oil is more effective than single-molecule.

# Serving Suggestions

## Dosage Recommendations

### HEMPWORX DOSAGE RECOMMENDATIONS

*Each full dropper (1ml) contains 10-15mg of CBD and you can control your dosage by squeezing the right amount into the dropper. This info is purely a guideline and does not replace your medication or doctor prescriptions. The information contained is merely a starting point of reference. The fact remains that everyone is different and will react different to their CBD dosage. As serving size or dosage of CBD is different for everyone, it is best to start small and gradually increase until you experience the desired result.*

#### HEMP WORX CBD OIL

**1 Full Dropper = 1 Serving**

**1 Serving = 10-15mg of CBD** (depending on whether you have a 500mg or 750mg bottle)

**Maximum Recommended Dose = 20-30mg Daily** (Full Dropper Twice A Day)

#### HOW TO USE OUR CBD OIL

We recommend you start slow and gradually increase your dosing over a 3-4 week period. Start with 5 drops (1/4 of a dropper) twice a day for the first week. On week 2-3, go up to 10 drops twice a day. By week 4, you can go up to 20 drops (full dropper) twice a day to get the full 20-30mg of CBD daily. Experiment a little, and see what works for you. **We also recommend that you consult your local doctor or physician for dosage recommendations.**

#### MORE DOSAGE RECOMMENDATIONS

Increasing appetite in cancer patients: 1-2 mg of CBD Oil daily  
Chronic pain: 2.5-20mg of CBD Oil daily for an average of 25 days  
Epilepsy: 100mg of CBD Oil daily for up to 5 months  
Movement problems associated with Huntington's disease: 10 mg of CBD Oil daily for six weeks  
Sleep disorders: 40-160 mg CBD Oil daily 15 minutes before bed  
Multiple sclerosis symptoms: 2.5-120 mg of CBD Oil daily for 2-15 weeks  
Schizophrenia: 40-1,280 mg CBD Oil daily for up to four weeks  
Glaucoma: 20-40 mg under the tongue. Doses greater than 40 mg may actually increase eye pressure

**Legal Disclaimer:** There are no approved clinical studies to validate the statements in this image. This information is based on independent testimonials of CBD oil users. These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease. The Food and Drug Administration (FDA) considers non-THC based hemp products to be "food based" and therefore legal without a medical marijuana license.

# Hemp Oil Extract Is In A Class All Its Own

More than 400 phytonutrients exist in hemp plants. Our Extraction technology allows us to extract all of these nutrients, without using any heat or harmful solvents. The result is a whole food with exceptional nutritional qualities. With Hempworx you're getting highly sought CBD, plus the 400+ other nutrients in a naturally synergistic, easy-to-use, easy-to-absorb form. It truly is a one-of-a-kind product.

## Bipolar, Anxiety, Depression, and Stage 4 Endometriosis GONE!

Keri Dawn Fennewald

I wanted to share my results with CBD Oil. I started taking CBD oil to help with my bipolar type 1, anxiety, depression and stage 4 endometriosis. Recently I had 2 spots show up on my face. One on my chin, one on my cheek and one on the waterline of my eye which has been there almost 2 years. The spot on my eye started hurting and everyone convinced me it was a sty. After going to the Dr I found out it was skin cancer and declined traditional treatment. I've watched my friends mother go through the battle and that route was not for me. Last Friday I took my health into my hands and began applying CBD oil directly to each spot morning and night while continuing drops sublingual as well. I was advised to cover the spots and opted not

to do that. The spot by my eye was tricky to do and not get it in my eye. By night one 2 of my spots looked worse and I freaked. Apparently this is normal as it brings the cancer to the surface so I calmed down and continued. Day 2,3 & 4 they all looked ugly, very ugly and brown except my waterline which was whiter and red. Day 5 the spot on my waterline and chin is down to half the size it was when I began. The spot on my cheek was the size of a pencil eraser with a brownish outline. Day 6 I could barely see the spot on my cheek. Day 7 the spot on my cheek is gone, no discoloration nothing but, there's a tiny scar. The spot on my chin is now a quarter of the size it was the day before. No change from Day 6 on my waterline spot. I'm going by my Doctors office tomorrow so he can see for himself in person the results I've had since last Friday. He said, typically with CBD oil it takes 3 weeks and I should continue using it on all spots a minimum of 3 weeks. I don't cry and this made me cry happy tears as this scared the hell out of me. I've took pictures to document my results and my hope is by telling my story it helps at least one other person. I'll include a picture of my eye so you can see the difference yourself.

## Chronic Knee Pain Gone!

Melissa Honeybee

I'm in love with the hemp oil. I've had chronic knee pain for 20 yrs from playing soccer in college and it's GONE! I'm a HUGE fan and will be sharing my testimony to everyone. It's a relief to finally have relief from not aching all the time ! I'm a believer! I have had 5 knee surgeries in my life and need 2 more...( soccer goalie) Hempworx is the ONLY thing that's given me relief from the constant aching pain. I'm a true believer in this product!

# What is the best way to take/use CBD?

We have several powerful delivery systems that you can use for optimal results. The drops are by far the most concentrated form of CBD because you are getting in sublingually (under the tongue). There's a 98% absorption rate with the tincture drops because the CBD gets absorbed right into the bloodstream. However, if you are looking for the best skin care products on the planet, we recommend our CBD Skin Care line.

# How is Hemp Worx CBD Oils Superior?

Our products are non GMO, organic, made in the USA, and very rich in the raw materials we use. We are confident in our products because we utilize the full spectrum Cannabis plant and our customers will get better results with our products than any others in the marketplace!

# Are your products safe?

Yes. All our hemp crops are grown free of chemical fertilizers, herbicides, and pesticides, so our quality starts with our hemp plants. From the time our hemp oil is harvested to the manufacturing and shipping of our products, we test our hemp oil multiple times to ensure accuracy in potency information and to check for contaminants like pesticides, herbicides, heavy metals, and mold, as well as cannabinoid content. We also use a subcritical CO2 method when we extract our hemp oil, instead of harsh solvents. CO2 is a much healthier choice than other potential solvents and is “generally regarded as safe” (GRAS) by the FDA.

## What's the difference between CBD oil and the hemp products I buy at the grocery store?

Hemp products sold in stores are most often made with hemp seed oil, which can contain only trace amounts of CBD. While it has been noted that hemp seed oil can be a great source of nutrition, its marginal quantity of CBD per weight makes it unfeasible as a CBD supplement. Our CBD hemp oil, however, is extracted from the stalk of specifically selected hemp cultivars, offering higher percentages of CBD by weight and additional nutritional benefits from the contents of our oil.

What kind of testing/analysis is performed on your items?

All of our products are manufactured in an FDA registered, FDA food registered, FDA approved, CGMP certified, and cruelty free facility. We undergo extensive stability testing and can provide a Certificate of Analysis and Chromatography Test.

# Why is a full spectrum plant superior to CBD isolate?

In our experience, a full spectrum plant gives the Endocannabinoid system (ECS) the full cannabinoid profile of CBD, CBG, CBC, CBN, in order to substantiate the health claims. We have over 120 cannabinoids in our CBD formulas which perfectly inhibits the CB2 receptors in the body. Other competitors claim to have a 99% purity which is usually in the form of "Isolate" or an "Extract". Although the purity level is higher, the body is only receiving CBD, not the full cannabinoid profile. CBD Isolate is cheaper to manufacture, and when the CBD is isolated, those products lose its effectiveness.
